## Pacmaan<sup>®</sup> NA 772

An inter-braided packing made of pure PTFE fibre and pure graphite fibre

- A combination of two different chemical properties makes it unique multi-service packing
- Presence of graphite fibre disperses excess heat generation due to friction

*Mechanically strong but flexible*

<b>Service Media and Conditions</b>	Acid, oil, corrosive gases, alkali
<b>Temperature</b>	-100°C to 280°C
<b>Pressure</b>	25 bar (rotary)
<b>Shaft Speed</b>	10 m/sec (rotary)
<b>pH</b>	0 to 14
<b>Applications</b>	Pumps, valves, mixers, agitators
